Because nobody can manage your money better than you.

AeroCentury Corp. (ACY)

My subscribers received a Market Watch Alert that included a breakout buy price of \$6.00 in June of 2006 which was followed by a Trigger Alert @ \$6.00 in November of 2006 confirming the price had reached the break out price. In January 2007 a Take Off Alert was sent out when the price reached \$7.00. A quick Sell Alert was sent out in March 2007 @ \$21.25 after several spikes, a false gap move, and significantly higher volume gave their signal to sell. We decided to sell here from the dictum that too much profit too quickly should be taken advantage of. A maximum profit of 254% could have been made in 5 months.
