## ARNA Arena Pharmaceuticals Inc (NASDAQ GM)

157% in Profit in 10 Months

ARNA was brought to our subscriber's attention with a **Market Watch Alert** as it approached intermediate term resistance near \$7.00 in December 2004. It hit the \$7.00 **Trigger Alert** buy price in May 2005 starting a nice slow climb for the next four months. The **Take Off Alert** of \$8.50 was hit several months later in July 2005. Our **Sell Alert** of \$18.00 came in March 2006 where the increase in volume, inability to climb above previous support/resistance in 2001, and weak technicals indicated it was time to sell.
