Bradley Pharmaceuticals (NYSE)

339% in Profit in 8 Months

A **Market Watch Alert** was issued for BDY in February 2000 which was known as BPRX and it traded on the Nasdaq at that time. The **Trigger Alert** buy price of \$4.50 was set based on a 9 year base with resistance near \$4.50. This price was reached in May 2001 and after a brief pullback took off. The **Take Off Alert** of \$5.75 was hit the same month. Our **Sell Alert** of \$ 19.75 was based on higher volume and a surge from below \$8.00 to over \$23.00 in three months time. The final selling price was determined by half the move of the final month which was near \$19.75 and was triggered in December 2001.
