## BPSG Broadpoint Gleacher Secs Growth (NASDAQ GM)

324% in Profit in 19 Months

A **Market Watch Alert** was issued in December 2007 to watch for a base breakout to occur @ \$2.15 where previous support had existed in late 2006. Our **Trigger Alert** buy price of \$2.15 was reached in April of 2008. The price then consolidated for 11 months at a slightly higher level before breaking out again in early 2009. We issued a **Sell Alert** in October 2009 based on time symmetry observations, weakening technicals, and relative heavy volume.

The listed selling price was the maximum possible profit to be expected if you sold at the high price of the week we recommended selling. Profit will vary based on each individual's decision of when to buy and sell and market conditions. The information presented here is listed for informational purposes and in no way guarantees this actual result. Actual results will be less based on exact point of sale and the consideration of commissions as well. Past performance is no guarantee of future results.
