## CFK CE Franklin Ltd. (NYSE-Ait)

538% Profit in 25 Months

We alerted customers to CFK in July 2003 when quiet volume and price action were apparent. It wasn't until 6 months later that the Trigger Alert price was reached in January of 2004. During the next year it a slow moderate rise which we like to see then really began to take off the following January and moved up nicely with distribution volume. We used volume, MACD technicals, and trend lines on weekly charts to call a Sell Alert in February of 2006 some 25 months after entering the trade.
