## DCM NTT DoCoMo Inc (NYSE)

8.1% in Loss in 1 Month

DCM hit its **Trigger Alert** @ \$19.00 in December 2008 shortly after being put on a **Market Watch Alert** that same month. We issued a stop loss due @ \$17.00 to protect against a false breakout. DCM climbed for one month to a high of \$20.35 and began to fall. A Sell Alert was issued to sell immediately on Sunday 1/11/09 due to an earlier quick two day pull back that came within .01 of our stop loss. We consider the opening price the sell price since it was recommended overnight although it was possible to sell as high as \$17.92 and as low as \$17.38. Although we do not set stop loss prices for stocks initially when price action alerts us to possible foul winds we would rather miss the chance at profit then hold onto a poor moving stock in hopes that it MIGHT recover.
