VSR Versar Inc (NYSE-Alt)

136% in Profit in 3 Months

VSR was noticed in a triangle base and was issued a **Market Watch Alert** on its third attempt to break out in April 2006. It did not hit its **Trigger Alert** buy price of \$5.50 until over one year later in May 2007. The **Take Off Alert** of \$6.75 was reached in May as well. This stock moved up sharply on higher volume and in 10 weeks was up over 175% time to seriously think about preserving such quick gains. Our **Sell Alert** of \$ 13.00 was based on previous shakeouts during the 10 week rally.
